VA.GOV FOOTER

Users must enter something in the search box, or allow the browser to use their current location, before the tool can be "activated."

We may limit selecting only one facility type at a time, based on how different facility data are called. But it would be better for users to allow them to select multiple facility types.

The Filter menu only shows if additional filters are available for a facility type. Users filter using typeahead, or have the option of seeing an alphabetical list with checkboxes.

Facility Search Panels are built with block-level elements, so only data/content fields that are available get displayed. If a facility does not have a Facility Detail Page, then its name is not hyperlinked.

Facility Panels are ordered and numbered by distance, with corresponding location pins on the Map.

Facility Type indicates to users which facilities are VA and which are not. Urgent Care is a combination of VA facilities and community care providers. Emergency could be an alert, or a display of all VAMCs with emergency rooms, or both.

Technically, Emergency is a filter of VA health care facilities; Urgent Care is a filter of VA health care facilities AND community care providers; and Retail Pharmacies is a filter of community care providers.

VA.GOV FOOTER

All VA facilities will have a Facility Detail Page. New/upgraded VAMC facility pages will live on the VAMC site, not in the Facility Locator. We should **not** keep creating Facility Detail Pages for non-VA owned-and-operated facilities (i.e., community care providers).

The Facility Detail Page design is based off the new VAMC facility detail page.

All of the Location and Contact Information data comes from the Facility API, except the facility image (this would need to come from Drupal).

We will need to create new VACO, VBA, and NCA facility pages in Drupal to manage and publish all page content **not** coming from the Facility API.

We should create new services taxonomies in Drupal for VBA, NCA, and (maybe)VACO facilities, like we did for VHA facilities.
