

## Mission Statement

VA is relaunching VA.gov as a user-centered, modern web property designed to put the needs of Veterans first.

Launch Date: November 7, 2018

Remaining Business Days: 2

**All technically critical elements are in place. Teams are finalizing launch PRs and redirects to be merged and deployed on November 7th.**

**Progress:** Sign In functionality on TeamSite sub-domain pages w/injected header + footer is in progress, as well as the final steps for coordinating launch logistics, and bugs + stylistic tweaks from the Kanban list.

**Constraints:** getting calendar invites to all appropriate Launch partners - there have been complications with invites being auto-filtered into the Junk mailbox for @va.gov recipients.

**Next Steps:** remind launch partners of upcoming meetings, set up #wbc-launch-ops room, finalize launch communication templates and email lists.

## Progress

- Vets.gov banner sharing preview.va.gov link live
- Search V2 live
- Homepage alerts and stories CMS + training complete
- 100% of traffic pointed at new servers
- Go / No Go and Check-in invitations sent to Launch group
- SSO solution live
- Facility Locator MVP solution for accessing other locators live
- Accessible breadcrumb solution incorporated

## Burndown
