

Mission Statement

VA is relaunching VA.gov as a user-centered, modern web property designed to put the needs of Veterans first.

Launch Date: November 7, 2018

Remaining Business Days: 19

There are multiple options for how TeamSite header/footer work could continue, and multiple options for how it could be prioritized amongst the other Kanban issues.

Progress: injection works for Variants 1 and 2 on www.va.gov URLs! Prepared to start injection work for cem.va.gov and benefits.va.gov, however revisiting approach with Chris J and Alex L before proceeding. *Could* continue perfecting for additional pages if desired, but recommend first completing next priority work.

Constraints: thousands of unique pages and scenarios to account for, no way to test/stage in connection with preview.va.gov experience for subdomains, other implementation options are reliant upon TeamSite administrators implementing changes – which we have less control over.

Next Steps: meet with Chris J and Alex L to agree on approach > decide whether to implement for cem.va.gov and benefits.va.gov or to prioritize for further down Kanban board > keep track of additional pages, domains, and tweaks in a separate epic and prioritize appropriately > once higher priority work complete, pick up epic and knock out a second round of TeamSite header/footer work.

Key requests

- Procure signatures on the Pentest ROE
- Help with TeamSite collaboration around subdomains
- Share launch checklist and runbook with, and get “on call” contact for: EWIS rep, NSOC rep, TeamSite Admin, Foresee Admin

Progress

- Interim CMS repos separated
- SSO works in staging, hoping MHV will have ready in prod 10/20
- TeamSite header/footer works for Variant 1 and 2 www.va.gov URLs
- Adjustments from usability findings complete
- Load testing and traffic routing under way
- Call Center training complete

Burndown

2 Technical issues complete **15 Front End** issues complete **1 Back End** issue complete **1 Design** issue complete **9 Content** issues complete
3 Accessibility issues complete **12 Bug** issues complete
